

Installation Instructions

Add-on 2 way 250 A TP Outgoing MCCB Housing

NHVM3P2502

This kit should be installed by a qualified competent person in accordance with all relevant legislation and regulations including building regulations and wiring regulations BS7671. If in doubt contact a qualified competent person.

- Turn off all power supplying this equipment before working on or inside the equipment.
- Always use a properly rated volt-sensing device to confirm the power is off.
- Replace all devices, doors and covers before turning on the power to this equipment.
- To avoid ingress of swarf and similar material, always remove gland plates to allow cutting/slotting for cable entries.

Failure to follow these instructions could result in serious injury or death.

DO NOT USE POWER TOOL SCREWDRIVERS ON ELECTRICAL CONNECTION

Fitting Instructions

- Before assembling the Add-On unit to the main panel, remove the door, front shield & the gland plate from the main panelboard and the Add-On unit
- To remove the door, refer to Fig. 1.

Attach the Add-On unit to the panelboard using M6 Nuts, bolts and contact washers supplied (19 Fixing locations). Refer to Fig. 2a and Fig. 2b.

Once the shield, door and gland plates have been removed, start to assemble the add-on enclosure to the panelboard. Refer to Fig. 3.

Electrium Sales Limited, Walkmill Lane, Cannock, WS11 0XE Tel: 01543 455000 Fax: 01543 455001

When the Add-On unit has been attached to the main panelboard, fit the busbar connections as shown in Fig. 4. M8 coachbolts are to be fitted from underneath and fastened with M8 nuts & disc washers

Fig. 4

Refer to Table 1 tor torque settings.

Please recycle where waste disposal facilities exist.

Connection Type	Recommended Torque	
M8 Nuts	20 Nm	
M6 Nuts & Bolts 10 Nm		
Table 1		

Fit 2 x 70 mm² Neutral cables with lugs from the Add-On unit Neutral busbar to the main Neutral
